PLANT CATALOGUE

1923

H. L. McCONNELL & SON
SMALL FRUIT PLANT SPECIALISTS
PORT BURWELL - - ONTARIO

Greetings

It is a pleasure to again have the opportunity of placing our catalogue in the hands of our many customers and friends. Few people stop to think how much work and careful attention it takes to write up and distribute the many thousands of catalogues that we issue each year. We try to put out a catalogue that is a credit to our business and at the same time one that is reliable and of use to those who read it. We also endeavor to place the merits of our goods before you in the same way as if we were talking personally to you and furthermore we wish you to regard the contents of this book as a direct personal appeal to you. We know it is impossible for each one who reads this catalogue to visit our nurseries and so we endeavor to tell you about our stock and service, and why you should buy McConnell's Plants. It has taken many years of hard and painstaking work to build our business up to the status it maintains to-day, but when you stop to consider that we are conducting the largest Small Fruit Plant Establishment in Canada, you will realize that it is a result of honest dealings and honest goods. We do not wish to convey the impression that we never make mistakes, for any man who gives that impression is certainly straying from the truth. In the rush of the busy season, when everyone is overworked, mistakes will occur, but if anything is wrong, write us fairly and decently, and we will adjust the matter. We are all human and mistakes will sometimes occur, but we do say that considering the thousands of orders that we send out each year, the complaints we receive are very few and speak well of the care we take in looking after our customers' interests.

Fruit prices the past season were considerably lower on the average than for some time, but this was due mainly to the fact that there was an abundant crop of most every kind of fruit, a thing that does not happen very often and may not happen again for years. Past records and experience however, have shown that the very time to plant is when there is an abundant crop and prices are low. The pendulum starts to swing the other way and a great many people do not take advantage of it. You have no doubt seen the time when prices reached a low ebb and growers let up on their plantings. Then prices would start to go up and growers were not prepared with a good supply for the ready market. We feel safe in saying that the fruit industry has a very bright outlook, and that prices will rise and maintain a very profitable level. Why not increase your plantings this year?

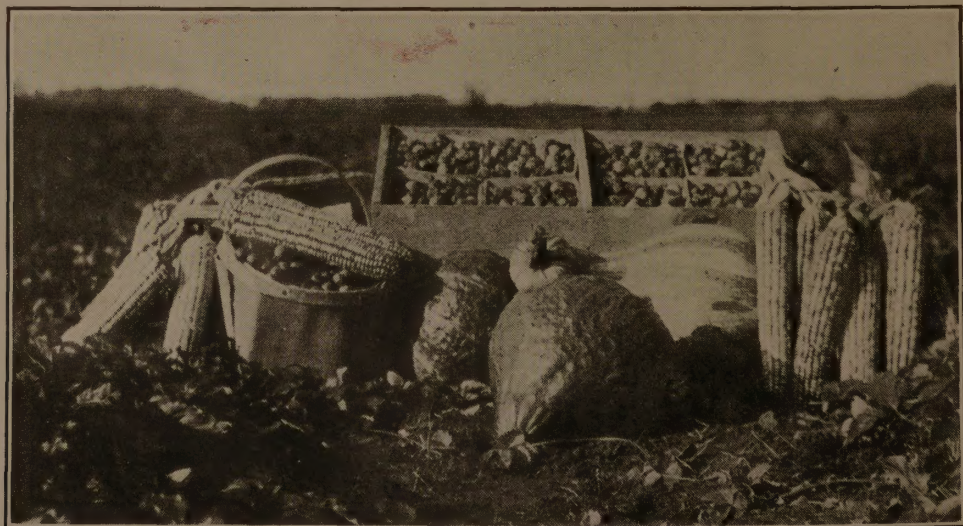

We urge upon you the importance of sending in your order early, preferably as soon as you receive this catalogue. If delayed until planting time some of the varieties are sure to be exhausted. By ordering early your plants will be reserved until spring and then will be freshly dug, carefully packed and shipped to you in the best possible manner. When deciding what to plant make sure that you are selecting varieties that are adapted to your soil, locality, climate and market conditions. If there is anything you want to know about varieties, culture, etc., just write me and I will be only too glad to answer to the best of my ability.

Soliciting your continued friendship, your liberal patronage, and wishing you all abundant success, I am,

Yours sincerely,

S. McCONNELL, Manager

Long Distance Telephone, via Aylmer, No. 30596.

A crate of Progressive Strawberries photographed on October 13, 1919, at our Nursery. Just think of having Strawberries when Grapes are ripe and corn, squash and pumpkins are mature.

Booked.....

SHIP BY
(Mail or Express)

SHIP ABOUT1923

NAME OF RAILWAY

[illegible]

McConnell's Free Delivery

Our customers have no express or parcel post charges to pay. We pay all transportation charges on our stock at catalogue prices to any point in Canada. One-half charges to points outside of Canada. This means a big saving to our customers and also relieves them of the difficult task of determining the amount of postage for parcel post shipments, or wondering what the express will be on their order. As this represents a very great expense to us we reserve the right to ship either by parcel post or express as we may consider best. Small parcels up to 8 or 10 pounds we usually send by parcel post.

Think This Over!

Why it Pays to Plant McConnell's Plants.

Before we go on to describe and list the different varieties of Small Fruit Plants, Ornamentals, Perennials, etc., that we grow and offer for sale, we wish to emphasize the importance of selecting the place where your stock comes from. Have you ever stopped to think how much depends on the stock you plant and that **the success you have depends largely on where you buy your plants.** Remember! Cheap plants are usually dear at any price. Take strawberry plants for instance. You may know of a place where you can purchase plants at a cheaper price than what we charge, but in the majority of cases, these plants are surplus plants dug from between the rows and certainly not to be compared with **McConnell's Plants, grown for plants only,** and in which the whole row is dug. Having this in mind we wish to impress upon you the importance of buying McConnell's Hardy Canadian Stock.

The land on which our stock is grown ranges from sandy loam to clay loam and is previously brought to a high state of cultivation. Certain varieties do best on clay while others do better on sandy soil and thus we can grow our stock where best suited. Our plant fields are carefully prepared, planted, cultivated and hoed, and thus the plants are brought to a high quality. Bush fruits are carefully dug chiefly with our power digger, which leaves a magnificent root system. Strawberry plants are all dug in the spring from day to day as required to fill the orders we send out.

Our business is growing and shipping Small Fruit Plants, Asparagus Roots, Ornamentals, etc., and we devote our full time and energy to this. Consequently we can give you better stock and better service than where one is selling stock as a side line. Moreover our salesman is this catalogue and therefore our prices are much lower than nurserymen who deal through the medium of agents.

Do We Endeavor to Give Satisfaction?

One of the thoughts that naturally comes to many of those who read this catalogue is, "are McConnell's reliable and do they endeavor to give satisfaction." This is a very important and natural thought with anyone. As stated elsewhere in this catalogue we have been in the Small Fruit Plant business for 25 years and the great growth of our business in the past decade should speak well of our reliability. **We grow, dig and ship each year more Small Fruit Plants than any other firm in Canada,** and if we did not have the confidence of our customers, we could never have reached the position we have. Among our customers are persons who have favored us with their orders each year ranging from a few plants to many thousand. What better advertisement and criterion for others can we have than those who have seen fit to favor us with their orders year after year for 10 to 15 years.

An honest live-and-let-live policy is what we believe in, and we endeavour to follow that policy in all our dealings. We try to treat your order, received from you in the mails, just as we would treat you personally if you drove to our packing house for the plants. Small orders receive the same careful attention as the large ones. We appreciate all orders and fully realize that our business depends upon the success our customers have with our plants. Satisfied customers are what we want and if you favor us with your order we will endeavor to make the transaction both pleasant and profitable to you.

Service

In the spring months, with our large force of diggers, planters, tyers and packers we present a busy scene. All strawberry plants are freshly dug, gathered in sacks immediately and taken straight to the packing house, where they are protected from sun and wind. Arriving at the packing house they are trimmed, counted and tied by our large force of tyers in bunches of 25 plants, 40 bunches to the thousand and there will be ten hundred or more good plants in every thousand you get. After being tied they are packed by our packing staff into light, ventilated crates in damp sphagnum moss. Mail shipments are wrapped in waterproof paper in moss. Bush fruits, asparagus and ornamentals are carefully packed in the best possible manner in boxes or bales in damp packing. After being packed they are taken to the post-office or station in our motor truck.

By these efficient and careful methods we endeavor to ship stock in such condition that it will reach our customers in the best possible condition. Remember we ship to all parts of Canada and Newfoundland, and considerable to the United States, and other parts. We will endeavour to give you satisfaction if you **PLANT McCONNELL'S PLANTS.**

Grow Strawberries For Big Profits and Quick Returns

Strawberries will bring in large returns quicker than most any crop you can grow. Within fourteen months after planting you commence harvesting the crop and net returns of \$1000.00 per acre are common. Any good soil will produce big, paying crops of strawberries, though naturally the better condition of the soil, the larger the returns.

It requires very little training or capital to start growing berries for market purposes. Besides the plants, a trowel or spade for planting and a hoe and cultivator for working are all the equipment needed.

You can make big money growing strawberries and the main thing is to start right.

FIRST—Make your order out at once and have your plants reserved for you. In this way you can get your choice of varieties before some are all sold out. Our customers are making big money growing berries and our big healthy plants will do the same for you.

SECOND—Remember that results are what you want in growing strawberries and cheap plants are poor economy. It takes more labor to make a poor plant grow and your berry crop will disappoint you. The first cost of the plants is a small item and our big, healthy plants are the ones you want to insure big profits. Don't delay, but place your order at once.

Culture Hints

In acknowledging each order we will send forward a small booklet on "Cultural Directions for Small Fruits." For the convenience of our customers in making out their order we give the following hints.

Spring is the best time to plant strawberries and the earlier the better. Distances in planting vary according to the method adopted and the nature of the varieties used. As a general rule the rows may be 3 1-2 feet apart, though some prefer 4 feet. For the matted row system ordinary kinds may be set 18 to 24 inches apart in the row and fast runners like Sen. Dunlap or Dr. Burrill may be planted 24 to 30 inches apart. If to be grown in hedge row or hill culture 12 to 18 inches apart is proper.

In making out your order consider what your requirements are. For home use you make no mistake in planting Grand Prize, Charles I, Premier, Hundred Dollar (for dessert). Dr. Burrill Brandywine or Sen. Dunlap with Orem or Stevens Late to lengthen the season. If you intend to grow berries for sale make yourself familiar with the demands of your market. Will it require fancy fruit at high prices or an ordinary grade that can be sold cheaper? Is your market distant or near? If distant you need good shippers; if near, then the more delicate sorts can be used.

Perfect and Imperfect Blossoms

All varieties we list, except Sample and Prize (Kellogg's) have perfect blossoms or in other words are self fertilizers and need no other varieties planted near them to produce big crops of fruit. In planting Sample or Prize put every third row to some good pollenizer such as Dr. Burrill, Sen. Dunlap, Parsons Beauty or Magic Gem. In our catalogue we mark Perfect varieties (per) and Imperfect varieties (Imp.). The Everbearing variety we list is a perfect sort.

NOT A POOR ONE IN THE LOT

Received the plants yesterday. Am well pleased with them; not a poor one among the lot. The Boskoop were certainly fine.

J. L. Winter & Son, Chatham, Ont., April 1922

EXCELLENT SHAPE

I am in receipt of the shipment of berry plants which are in excellent shape after one week's growth.

Mrs. H. Fay, Wyoming, Ont., May 1922

EVERBEARING STRAWBERRIES

For Profit and Pleasure

Remember! A crop of berries the same year you plant them.

The Everbearing Strawberries are not an experiment, but a proven success. They will bear an unbelievable quantity of berries the same year as planted during August, September and October, single plants often producing a quart of berries. They bring fancy prices, 40 to 50 cents per quart being easily obtained. Plants are perfectly hardy and vigorous. They should be planted in every garden in the country and are also profitable when grown for market. A few dollars invested in Everbearing plants will save many dollars in your grocery bill, and also give the whole family more pleasure for the money than anything else you can buy. Fully 75 per cent. of the orders we receive include Everbearing.

PROGRESSIVE EVERBEARING

HINTS ON CULTURE

As the Everbearing varieties produce a wonderful crop of berries, naturally they are strong feeders and consequently you should have your soil in good condition. By following the few directions given here you can have a heavy crop of fruit three months after the plants are set. If possible select a rich, loamy soil (not necessary but preferable) cover with well rotted stable manure and plow under to a depth of six inches. This will give the roots something to feed on and promote a strong luxuriant growth. Harrow the soil thoroughly and roll before planting. This makes the soil fine and compact. The soil is now ready for planting, which should be done carefully, spreading the roots out well. Press the soil very firmly around the plant. More plants are lost each year by not pressing the soil firmly around them, than from any other cause. After planting cultivate and hoe at once and stir the soil once a week thereafter. Keep all blossoms off the plants until the middle of July, which can be easily done when hoeing them, and all runners removed as fast as they appear. By keeping the runners removed the growth will all be thrown into the plant and fruit. By following this method the plants become very large and produce an amazing quantity of berries the balance of the season or until hard freezing weather. For field culture plant in rows 3 1-2 feet apart and 12 to 15 inches apart in the row. For garden culture plant in rows 2 feet apart.

Actual photograph of one of our plants taken on Sept. 28, 1922. Note the great load of berries

PROGRESSIVE [Per]

The Best Everbearing Variety

(See illustration on front cover)

The demand for this truly wonderful variety is growing by leaps and bounds. Everyone who likes strawberries should have them in his garden. The plant is a strong grower, and produces immense crops of medium to large berries of a bright, attractive appearance. Berries are of excellent quality, firm and good shippers. Keep all blossoms removed until July and then during August, September and October you can pick these luscious berries. Include some Progressive Everbearing in your order this year. **Heavy rooted, guaranteed true to name plants—\$3.50 per 100, postpaid.** For price on other quantities see page 10.

STRAWBERRIES

We list only those kinds that we can fully recommend to our customers. We have tested hundreds of varieties in the past 25 years and discarded all that did not prove worthy of trial by our customers. We have some more varieties under trial at present, but we will not offer them until we feel that they are as good or better than those we already list.

We have grouped the varieties as to season of ripening. In selecting varieties it is well to consider the purpose of growing the berries, that is, home use, local market or distant shipment. Our descriptions are made up from actual observation of the varieties in our fields and are as accurate as we can make them. If you are uncertain as to what to plant, write us, giving your conditions of soil, climate and market, and we will help you make a good selection. A great many leave the selection of varieties to us.

(Per). denotes Perfect or Staminate blossoms. (Imp.) denotes Imperfect or Pistillate blossoms. Perfect varieties do not need to be planted near those marked Imperfect, but on the other hand Imperfect kinds need some perfect variety planted about every third row.

EXTRA - EARLY VARIETIES

CHARLES I

PREMIER (Per)—This beautiful extra-early berry is fast taking a first-place among strawberries and in many sections is grown almost exclusively. It is very productive and the berries are extraordinarily large for an extra-early variety. Makes a fine fruiting row of large, stocky, healthy plants. Berries are of high quality, beautiful glossy red color, uniform and splendid shippers. We take no hesitation in recommending this wonderful berry to all berry growers, whether for home use or market. **\$11.00**

per 1000. Dont fail to include either Charles I or Premier in your order.

CHARLES I (Per)—One of the finest and most popular extra-early berries on the market. On account of its extra-earliness, productiveness, large size, appearance and quality, it is a **money-maker** and you can depend that it will make you big profits. In plant growth it is first-class, making a fine fruiting row of large, very healthy, stocky plants with very long roots. Very productive of large, uniform berries of good quality and color and which keep their size till the last picking.

Plant Charles I this season and we will guarantee that the fruit will please you and bring you big profits. **\$9.00 per 1000.**

PREMIER

MEDIUM - EARLY VARIETIES

DR. BURRILL

DR. BURRILL (Per)—(See illustration on back cover). Termed the new million dollar strawberry and rightly so, for it has made millions for the berry growers of America. A cross of Sen. Dunlap and Crescent and superior to either. For productiveness it cannot be excelled and the plants, having very long roots, are great drought resisters. A splendid plant and plant maker and you can always depend on getting a good fruiting row. Berries are large, of high quality, firm and of a beautiful even shape and dark glossy red color with bright yellow seeds which makes it a very attractive berry and commands the highest prices. We have a beautiful stock of these but order early for the demand will be very heavy. **\$9.00 per 1000.**

HUNDRED DOLLAR (Per)—We do not recommend this berry for canning or shipping, but if you want the finest dessert berry for home garden then order some Hundred Dollar. Fruit is very large and sweet, being almost without acid. Plants are large, vigorous, healthy and productive. Also known under various names as follows: Corsican, Pineapple, Uncle Jim, Dornan, New York, Ryckman, Pride of Michigan. **\$2.00 per 100.**

SENATOR DUNLAP (Per)—Without doubt the leading and best known berry in America and too well known for lengthy description. It succeeds nearly everywhere and produces enormous crops of medium to large, handsome, firm berries of excellent quality. A great plant-maker and can be depended on to make a first-class fruiting row. The Senator Dunlap will make you a big profit on your investment. Plant an acre or two of this popular berry. **\$7.50 per 1000.** We will furnish 5000 Sen. Dunlap for **\$35.00; 10,000 for \$65.00.** For less than thousand lots see prices on page 10.

SENATOR DUNLAP

REMEMBER !

McCONNELL'S PAY ALL TRANSPORTATION CHARGES (BOTH MAIL AND EXPRESS) TO ANY POINT IN CANADA AT CATALOGUE PRICES.

ARNOUT

ARNOUT (Per)—The following is the description of the Arnout as given by the Central Experimental Station, Ottawa:—"Originated by J. L. Arnout, Luzerne County, Pa., and introduced in 1905. Fruit conical and wedge conical, large, bright, scarlet, glossy, seeds prominent, flesh bright, red, juicy, tender, firm, above medium in quality; season medium to late. Plants are vigorous, runners numerous foliage good. One of the best late varieties." The above is a splendid description of this fine berry. It is very productive and a good shipper. **\$7.50 per 1000.**

BRANDYWINE (Per)—Very popular for canning purposes. Not grown extensively for market, but in demand for those wanting a good canning berry of high quality. Productive of large, uniform berries of a dark red color. **\$9.00 per 1000.**

STRAWBERRIES O. K.

We are pleased to advise you that the strawberries arrived O. K. and in good condition.
Crossland & Patterson Bros., Bala, Ont.,

June 1922

GLEN MARY

GRAND PRIZE (Per)—One conclusive proof of the great value and popularity of this grand berry which we introduced in 1915, is that the demand is increasing every year. For productiveness, quality, uniformity and firmness it is hard to equal. Its fine healthy plant growth, its perfect fruiting habit and its immense crops of large, deep red, firm, meaty, high quality berries make it a worthy addition to the list of strawberries. For preserving it cannot be excelled, the berries holding their shape in the jars and are very dark in color and of rich flavor. This berry delights in a rich, cool soil and if you have such, then order Grand Prize and you will never regret it. A splendid shipper and a money-maker. At the Central Experimental Farm, Ottawa, the Grand Prize in 1920, stood second in the list of the 25 highest yielding varieties under test. \$11.00 per 1000.

PARSONS BEAUTY (Per)—(Pocomoke, Gibson)—One of the most popular berries in cultivation and grown almost exclusively in many sections. Also known as Pocomoke and Gibson. It can be depended to bring a good paying crop every year and considering its great productiveness and fine appearance it is one of the most profitable varieties on our list. The plant is a strong grower with plenty of dark green foliage and wonderfully productive of large, evenly shaped berries of a dark, glossy finish. You will like Parsons Beauty and it will be a valuable addition to your list of profitable varieties. This sort is suitable for most any soil or condition. Do not miss these in your order. \$9.00 per 1000; Special Price, \$40.00 for 5000 plants; \$75.00 for 10,000 plants. For less than 1000 lots see prices on page 10.

PRIZE (Kelloggs) (Imp.)—Berries are large, beautifully formed, firm in texture and a fine shipper and very attractive. Similar to Sample but larger, more productive and considerably later. Those who like Sample will do well to include Prize to extend the season. Being imperfect in blossom, plant near Orem, Wm. Belt, or Stevens Late. \$9.00 per 1000.

SAMPLE (Imp.)—This well-known late "pistillate" variety is still in considerable demand. Very productive of large, very uniform, handsome berries of fine quality. A good plant and plant maker. Blossoms are imperfect and

GLEN MARY—Scarcely a week passes but someone remarks of the great merits of this berry. It is fast becoming one of the most popular and extensively grown berries in the country and in some sections is planted almost exclusively. For size, productiveness and appearance they are hard to beat. We have picked Glen Mary that only took 19 berries to fill a quart box. The berries are of good quality and firm enough for distant shipment and show up extra well at the end of the journey. It is an ideal plant and plant maker and its great crop of berries are well protected by the luxuriant leaf growth. We believe that anyone can pick as many quarts of Glen Mary as from any other variety, and being large and handsome they sell quickly at the highest prices. Do not miss this in your order. \$9.00 for 1000. Special Price \$40.00 for 5000 plants; \$75.00 for 10,000 plants. For less than thousand lots see price on page 10.

STRAWBERRY PRICES

SEE PAGE 10 FOR PRICES OF STRAWBERRY PLANTS IN QUANTITIES OF 25, 50, 75, 100, ETC.

REMEMBER ! WE PAY EXPRESS OR PARCEL POST CHARGES

PARSONS BEAUTY

should be planted near such varieties as Orem, Wm. Belt, Parsons Beauty. \$11.00 per 1000.

THREE W'S (Per)—Very popular in many sections and deserves a place in any strawberry collection. An ideal plant maker and very productive of large to very large berries of excellent quality. A splendid shipper and keeper. \$7.50 per 1000.

WM. BELT (Per)—This variety has been considered the standard of quality for years. Makes a fair stock of large, very healthy plants which bear a very heavy crop of large, high-class berries. Place your order early.

WILLIAMS IMPROVED (Per)—Undoubtedly the best known berry in Ontario, and still in great demand, although in some sections it has been superseded by Glen Mary, Parsons Beauty, Dr. Burrill. As a commercial berry it has been hard to beat, being a great cropper, and a splendid shipper. Berries are large and of handsome appearance. The white tip on the end of the berry disappears when fully ripe. **\$7.50 per 1000.**

VERY LATE VARIETIES

STEVENS LATE

OREM (Per)—Why not plant some Orem to extend the season. It is one of the latest varieties grown and is very productive of large, bright red berries of handsome appearance and excellent quality. Makes a large number of large, healthy vigorous plants. A valuable berry for market-gardeners or anyone wanting a good very late berry. **\$9.00 per 1000.**

STEVENS LATE (Per)—Another very late berry and like the Orem, being very late, the blossoms are practically immune to late spring frosts. Makes a magnificent fruiting row, of large bright red berries of fair quality. Include some in your order. **\$7.50 per 1000.**

Price List of STRAWBERRY PLANTS

(Note: This 1923 Price List cancels all previous prices)

Instructions for Determining the Cost of Plants

Beneath the varieties in each column below is a complete scale of prices which applies separately to each individual variety listed in that column.

If you want plants of more than one variety, figure the cost of each variety separately, the same as if you were ordering only that one variety, as the price which appears opposite any given quantity of plants represents the cost of each variety in that column and not a combination of varieties. For example: 200 plants of any one variety listed in column 2 costs \$2.50, but should you order 100 plants each of more than one variety listed in that column, each 100 plants would cost \$1.75, that is, 100 Parsons Beauty would cost \$1.75 and 100 Orem would cost \$1.75. 500 or more plants are sold at the 1000 rate.

KIND WORDS FROM NEW BRUNSWICK

The order of plants arrived O. K., and I am well satisfied with the plants and gooseberry bushes are fine. When I need plants or bulbs I will send to you for them.

W. J. Biggar, Sussex, N.B., May 1922

R A S P B E R R I E S

A Big Money Crop For Fruit Growers

Next to strawberries the Raspberry is the most important among berry fruits and in some sections it holds first place. Raspberries can be grown with less skill and do not require as much hand labor; most of the work of cultivation can be done by the horse. The demand for raspberries is constantly increasing and when you consider that a patch will last from seven to twelve years and continue to give big paying crops, is it any wonder that they are becoming popular. Do not combine different varieties to secure a lower rate. For example 50 Cumberland Raspberry would be \$3.25, but 25 Cumberland and 25 Golden Queen would be \$4.50 or at the 25 rate. In other words reckon each variety separate.

Delivered all charges prepaid to any Post Office or Station in Canada

Red Varieties

Red Raspberries will succeed on any good well-drained soil. The most popular method now is to plant red varieties four to five feet apart in rows six feet apart and cultivate both ways. Keep in hills and do not leave more than six to eight good strong canes to the hill. All young shoots appearing between the hills should be cut off as fast as they appear. Remove all old canes when the fruiting season is done and in the spring as soon as freezing weather is over, cut back the young canes to not more than three feet. Keep the soil well enriched and cultivate often.

CUTHBERT (Queen of the Market)—Introduced over 40 years ago and the leading market red raspberry in cultivation. It is a strong, vigorous grower, and very productive of large, bright crimson, firm berries of excellent quality. Perfectly hardy except in the Prairie Provinces and Northern Ontario where the Herbert is the best. For an all round late red raspberry plant Cuthbert. \$1.25 per 12; \$1.75 per 25; \$2.50 per 50; \$4.00 per 100; \$16.00 per 500; \$30.00 per 1000.

ST. REGIS (Everbearing)

O. K.

We received the strawberry plants on Monday in good condition.

C. MacKinnon, Wingham, Ont., April 1922

CUTHBERT

HERBERT—Extremely hardy and the one best raspberry for the Prairie Provinces, Northern Ontario and the colder parts of Canada. Originated near Ottawa which accounts for its hardiness. Bush a very vigorous grower and enormously productive of large, bright red, firm berries of first-class quality. About a week earlier than Cuthbert. \$1.50 per 12; \$2.50 per 25; \$4.00 per 50; \$7.00 per 100; \$15.00 per 250; \$27.00 per 500; \$50.00 per 1000.

ST. REGIS (Everbearing)—This wonderful everbearing red raspberry has come to stay and is increasing in popularity every year. The St. Regis begins to ripen with the earliest varieties and continues bearing through the fall on the young canes. If one is not particular about the early summer crop, then cut off all the canes near the ground in early spring. Then the new canes that spring up will bear a heavy crop of berries throughout the fall or until it freezes up. This is a truly wonderful berry and should be in every garden in the country. Very hardy and will stand the colder climates of Northern Ontario and most parts of the Western Provinces. Berries are large and of a rich, sugary, full raspberry flavor. Plant St. Regis this spring. \$1.50 per 12; \$2.50 per 25; \$4.00 per 50; \$7.00 per 100; \$16.00 per 250; \$30.00 per 500.

GOLDEN QUEEN (Yellow)—The finest yellow raspberry and a sport of the Cuthbert, which it resembles greatly except in color. Bush vigorous, very productive and hardy. Berries large, rich, golden yellow color. One of the finest for dessert and worthy of a place in every garden. \$1.25 per 12; \$2.25 per 25; \$3.50 per 50; \$6.00 per 100.

WE STRIVE TO EXCELL

I am very much pleased with the condition the strawberries were in on arrival. The way they were packed was a credit to the packers.

SPECIAL PRICE DELIVERED \$10.00

Black Varieties

Any good well drained soil will grow black raspberries. There is big money in Black Caps and a crop failure is practically unknown. Plant four to five feet apart in the row with rows six feet apart and cultivate both ways if desired. When canes reach a height of 2 to 3 feet pinch off the ends and they will then branch out and form a very bushy growth. These branches should be cut back to about 6 inches in the spring.

Plant a patch of Black Raspberries this season for handsome returns. There is nothing finer for dessert or preserves and they command high prices on the market.

CUMBERLAND — For a main crop Black Raspberry we believe the Cumberland is the best. It is a wonder in size of fruit, productiveness, vigor of plant growth and very hardy. Berries very large, firm, coal black and of excellent quality. Ripens medium early and covers a long season. We guarantee the Cumberland to please you and make you big money. \$1.25 per 12; \$2.25 per 25; \$3.25 per 50; \$5.50 per 100; \$12.00 per 250; \$22.00 per 500; \$40.00 per 1,000.

PLUM FARMER — A wonderful extra early black cap and fast taking a leading place. Being early it commands the highest prices. Its great crop of large, firm, jet black berries ripen in a very short period, which is a great advantage to the commercial grower with a ready market. Plants very healthy, vigorous and hardy. The

PLUM FARMER

Plum Farmer will give you a paying crop of extra, fine berries. Plant some this spring. Same price as Cumberland.

Purple Variety

Plant in rows 7 feet apart, and 5 feet apart in the row. Give the same culture as the Black Varieties.

COLUMBIAN—Do not miss ordering the Columbian if you have never tried them before. For productiveness, they cannot be equalled by any raspberry and the bush is a remarkably vigorous grower. Propagates from the tip same as Black Caps. The firm, dark purplish colored fruit often measures an inch in diameter, and is produced in unbelievable quantities. Nothing finer for canning and the finest of all for jams. Place your order for these. \$1.50 per 12; \$2.50 per 25; \$3.75 per 50; \$6.50 per 100; \$14.00 per 250; \$24.00 per 500; \$45.00 per 1000.

CUMBERLAND

Blackberries

The demand for Blackberries is increasing each year and the supply of this fine fruit is not equal to it. Who does not relish good blackberry pie. Why not plant some then and grow your own berries.

Plant on a good cool loamy or sandy soil and keep the soil well enriched and cultivated. Plant the same distance apart as recommended for Black Raspberries. The Eldorado is one of the finest varieties grown and we offer it to you with the full assurance that it will please you. We have a stock of beautiful plants which are sure to please.

ELDORADO

ELDORADO—The finest blackberry we have ever grown and will succeed wherever blackberries are grown. A very vigorous grower and remarkably hardy. Very productive of large, long, jet black berries of the finest quality and with their attractive appearance bring the top price on the market. We guarantee Eldorado to please you and bring you big money.

\$1.50 per 12; \$2.50 per 25; \$3.75 per 50; \$6.50 per 100; \$14.00 per 250; \$24.00 per 500; \$45.00 per 1000.

PERFECTLY

SATISFIED

Received plants in good condition and perfectly satisfied with them.

Mrs. W. Stewart,
Toronto, Ont., May 1922

Currant Bushes

The currant is increasing in popularity each year and in some districts the demand for it exceeds the supply. The currant will commence bearing the second year after planting and when planted between the rows in a young orchard will bring quick returns while waiting for the trees to bear. They are sure croppers every year and with good cultivation and liberal applications of manure every year or two will yield an enormous quantity of fruit considering the space they occupy. Currants can also be planted in the waste space in the garden and thereby furnish fruit for use in the home or to sell.

Our stock of currants is extra fine, being 2-year old, large and with a mass of fibrous roots. We use a power digger in digging our currants and consequently the root system is much better and if you send us your order we will guarantee you satisfaction.

Owing to regulations of the Government of British Columbia, currants and gooseberries cannot be shipped into British Columbia, from Province of Ontario, Quebec and Maritime Provinces.

Plant in rows 6 feet apart with plants 3 feet apart in the row. A cool, moist loam is the best, but they will also succeed on sandy soil if well enriched.

PRICE OF CURRANTS

EVERY PLANT, BULB AND SHRUB SATISFACTORY

Kindly forward me your catalogue. Every plant, bulb and shrub we received from you last year was most satisfactory in every way.

S. Haire, Toronto, Ont., Jan. 1922.

BLACK VICTORIA (Black)—The standard black currant of Canada and very popular. Bush a strong, vigorous grower and immensely productive of very large, sweet, mild flavored berries of attractive appearance. Unsurpassed for preserving or currant wine, and should be grown in every garden.

BOSCOOP GIANT (Black)—One of the finest black currants and fast becoming one of the leading in cultivation. In bush growth and productiveness is very similar to Black Victoria. Fruit very large and of the finest quality. Plant some.

CLIMAX AND MAGNUS (Black)—Owing to a mishap we have no Climax or Magnus to offer this spring. Will have a supply for Fall 1923 and Spring 1924.

CHERRY

CHERRY (Red)— An old well known variety and one of the finest for general planting. Fruit large to very large in well-filled bunches and of excellent quality. A vigorous grower and very productive.

FAY'S PROLIFIC (Red) — A very popular variety and largely planted. Perhaps more productive than Cherry but bush not quite as vigorous a grower. Berries are large, juicy and of fine quality.

LONDON MARKET (Red)— A very valuable variety in all sections and although a comparatively new variety is one of the most popular to-day. Bush a very sturdy grower, healthy and very productive. Berries, large, firm, very finest quality and a brilliant red. No garden is complete without a few bushes. A splendid commercial variety.

PERFECTION (Red)— A new variety that is becoming very popular. Fruit very large on long, well filled bunches. Berries bright scarlet and of excellent quality. This is one of the leading currants on the market and should be in every garden or commercial plantation. 40 cents each; \$3.50 per 10; \$8.00 per 25; \$15.00 per 50; \$28.00 per 100.

WILDER (Red)— Rapidly taking a first place among red currants. Fruit large, brilliant red and of fine quality. Bush a large, very strong grower and bears immense crops. Hangs extra well after ripening. Extremely hardy.

WHITE DUTCH (Red)— Don't miss planting a few white currant bushes. There is nothing finer for dessert or jelly. Bush a vigorous, hardy, healthy grower and very productive of large, fine flavored fruit.

Gooseberries

TWO-YEAR No. 1—STRONG BUSHES

Prepaid to any Post-office or Station in Canada.

DOWNING — Without doubt the most popular gooseberry in cultivation in America. Bush is a very vigorous grower, hardy and extremely productive. Never mildews. Fruit is large, pale green and of excellent quality. There is big money in gooseberries and every fruit grower should have a patch. 40 cents each; \$3.50 per 10; \$8.00 per 25; \$15.00 per 50; \$28.00 per 100.

RED JACKET (Josselyn)— Stands out as one of the most successful and popular of the American varieties. A large, strong growing bush and an enormous cropper. Berries large, oval and dark red when fully ripe. Should be picked for market when just turning red. Entirely free from mildew. Same price as Downing.

HOUGHTON — We have added the Houghton to our list especially for our customers of Western Canada. Bush is very hardy; a vigorous, healthy grower and extremely productive. Fruit small to medium in size, red in color and of excellent quality. Plant Houghton if you cannot grow the other varieties. 35 cents each; \$3.00 per 10; \$7.50 per 25; \$13.50 per 50; \$25.00 per 100.

DOWNING

Grapes

The Gem of Fall Fruits

Have you ever stopped to think how little money it takes to start a grape vineyard, whether for home use or commercial purposes? When you consider that a plantation of grapes will last 75 to 100 years with small labor outlay and expense it surely is a safe permanent investment. Grape growers have been making big money and net profits of three to five hundred dollars per acre are very common. The demand is very great and constantly increasing. If you want grapes for home use surely you have some waste spaces in your garden such as the south side of a building, along the fence or other out of the way place for ten or fifteen vines.

Plant grape vines for field culture in rows 9 feet apart and 8 feet apart in the row, which takes about 600 plants to the acre.

2 YEAR No. 1 STRONG VINES

AGAWAM (Roger's 15) (Red)—A very reliable variety that rarely fails to produce huge crops. Berries are large and firm, flesh tender and juicy, flavor and quality excellent. Keeps well. One of the leading red varieties. 40 cents each; \$3.75 per 10; \$8.50 per 25; \$16.00 per 50; \$30.00 per 100.

BRIGHTON (Red)—An early grape of superb quality. Vine healthy, vigorous and productive. The bunch is large and shouldered and the berries of the finest quality. A splendid grape for home market, but not a good shipper. 50 cents each; \$4.50 per 10; \$10.00 per 25; \$17.00 per 50; \$35.00 per 100.

CONCORD (Black)—The principal market grape in cultivation. The reason for this is (1) Its comparative freedom from mildew; (2) Its vigor of vine; (3) Its productiveness; (4) Its hardiness. Four tons to the acre are not an uncommon yield. Bunch large shouldered and compact. Berries large and of good quality. 35 cents each; \$3.00 per 10; \$6.75 per 25; \$11.00 per 50; \$20.00 per 100.

DELAWARE (Red)—Universally acknowledged to stand at the head of all American grapes for quality. Vine a moderate grower, hardy and a regular bearer. Bunch is medium in size, compact and usually shouldered. Berry small and of superb quality. A good shipper and brings top prices on the markets. Same price as Brighton.

CONCORD

Ontario Government Certificate of Inspection

No. 32

This is to certify that the nursery of H. L. McConnell & Son, at Port Burwell, Ont., Canada, has been inspected between June 15th and September 15th, 1922, under the provisions of the Fruit Pest Act, and has been found free from disease. This certificate expires June 15th, 1923.

Department of Agriculture,
Toronto, Ontario.

(Signed) L. CAESAR,
Provincial Entomologist.

NIAGARA

MOORE'S EARLY (Black)—One of the leading early grapes and a favorite with vineyardists in Ontario because of its earliness and good quality. Vine hardy, fairly vigorous, and productive of large berries of fine quality. Needs good cultivation. 40 cents each; \$3.50 per 10; \$8.00 per 25; \$14.00 per 50; \$25.00 per 100.

NIAGARA (White)—The standard white grape. In health, vigor of vine and productiveness it has no superior and it has been planted more widely than any other variety except Concord. Bunch is very large, often weighing 2 pounds, shouldered and very compact. Berry large and of delicious flavor. Somewhat earlier than Concord. Same price as Moore's Ey.

WORDEN (Black)—A seedling of Concord to which it is superior in earliness, size of berry and flavor, equal in vigor, health and productiveness, but not as good a shipper. Very valuable for home or nearby market. Same price as Moore's Early.

Asparagus

The earliest of all vegetables and the demand for it on the market is usually far in excess of the supply. Every farmer or householder should have a bed of asparagus, and if he has a surplus a ready market can be found. It is one of the most easily grown of all vegetables for being a perennial a bed will last a lifetime.

Set asparagus four to six inches deep and about 12 inches apart in the row. It is best to cover about 3 inches deep at first and fill in the trench as the plants grow. In the fall after freezing weather cut off the tops and burn them. Then cover the bed with a heavy coat of coarse manure. In the spring rake off the coarse straw and loosen the soil, being careful not to injure the crowns of the plants. Follow this practice year after year and a bed will last a lifetime and yield an enormous amount of shoots. Salt spread over the rows in early spring will kill the weeds and grass and also prove beneficial to the asparagus. Do not begin cutting until the second year after planting, after which the bed may be kept cut each year until midsummer, and then the tops must be allowed to grow and mature. We have a fine stock of heavy, one-year plants and guarantee that they will please you in every respect.

CONOVERS COLOSSAL—Without doubt the leading market variety in America. Very productive and stalks are very large, tender and of excellent quality.

COLUMBIAN MAMMOTH—A strong, vigorous grower producing an abundance of very large, white shoots that remain white until three or four inches high. Of fine quality and appearance.

GIANT ARGENTEUIL—This variety was imported by us from France over sixteen years ago. Produces under good culture, stalks that measure from 3 to 6 inches in circumference. Shoots dark green, tender and of fine quality.

PALMETTO—An early variety, very even and regular in growth. A great yielder and of fine quality.

CONOVERS COLOSSAL

LINNAEUS

LINNAEUS—Early, with large tender stalks of the finest quality. The best variety for table use. Stalks are of the finest appearance and sell extra well on the market. 25 cents each; \$2.00 per 10; \$3.50 per 25; \$6.00 per 50; \$10.00 per 100.

GOOD CONDITION

I received my strawberry plants in good condition yesterday.

A. Patton, Kearney, Ont., May 1922

Washington Asparagus

The Bureau of Plant Industry of the U. S. Department of Agriculture have for several years been conducting a series of experiments to produce a variety of asparagus that is immune to rust, a disease that has been very destructive in certain parts of the United States and to a certain extent in Canada. After very careful breeding work they have produced this pedigreed rust resistant, vigorous, high yielding strain of giant asparagus. We managed to procure enough seed last year to grow a limited quantity of this great new variety and offer **heavy true-to-name**, one year plants. Place your order early for the demand will be heavy. \$1.50 per 25; \$2.50 per 50; \$4.00 per 100.

R H U B A R B

This is the universal plant for early sauce and pies and is of great value as a blood purifier. **Everyone can have a supply of Rhubarb, whether they have a small city lot or a large farm**, as it takes up very little room and will stay in the ground indefinitely. Give it rich soil, clean culture and you can have an abundant supply.

HORSERADISH

Horseradish will stand a great deal of hardship and exist in the soil year after year. Plant in deep, rich, cool soil and you can have an abundant supply. Why not grow your own? Plant the cuttings when received, pointed end downwards and top about 1 inch below surface. 75 cents per 10; \$1.50 per 25; \$2.25 per 50; \$3.50 per 100.

Nut Trees

Every garden or lawn should contain one or more nut trees. They are very attractive in appearance, provide a splendid shade besides producing quantities of nuts for family use or to sell. There is big money in growing nuts and nut culture is just in its infancy. The English Walnut will succeed where sweet cherries can be grown. The Japan walnut is claimed to do well where the black walnut succeeds.

(Express charges prepaid to your station)

AMERICAN SWEET CHESTNUT (*Castanea Americana*)—A beautiful growing native tree. Valuable for shade and commences to bear as soon as apple trees. 4-6 ft. trees, \$1.25 each.

ENGLISH WALNUT (*Juglans Regia*)—A fine lofty, growing tree, with handsome spreading head. Produces large crops of thin shelled, delicious nuts which are in great demand. Will succeed wherever Sweet Cherries can be grown. 3-4 ft. trees, \$1.75 each.

JAPAN WALNUT (*Juglans Sieboldiana*)—This valuable walnut which will succeed where the black walnut can be grown is sure to be very popular. Very ornamental, a rapid grower and an early bearer. Nuts are produced in large clusters. Our trees were grown from nuts produced on our own farms. 2 foot trees, \$1.00 each.

BLACK WALNUT (*Juglans Nigra*)—A well-known native tree largely planted. 3-4 foot trees, \$1.25 each.

HICKORY (Sweet or Shellbark)—A very valuable native tree and prized for its fruits as well as its valuable timber and shade qualities. 4-6 foot trees \$1.00 each.

Photo taken in May 1922 of Senator Dunlap and Dr. Burrill on farm of H. Carver, Peterboro, Ont. Mr. Carver is well pleased with our Plants.

WHY OUR BUSINESS GROWS

Berry bushes, etc., to hand safely yesterday, and am very much pleased with same. I have recommended your stock to friends here, and you may expect an order or two this week.

A. Lane, Havelock, Ont., April 1922

THANK YOU

I received the plants in good condition and at the proper time. Thank you for good attention to my order. I will recommend you to any one around here needing plants.

C. W. Taylor, Shillington, Ont., May 1922

Ornamental Shrubs

Beautify Your Home Surroundings

The charm and beauty of any grounds, whether of the large estate or of the modest home, can be wonderfully improved by the proper selection and planting of our Hardy Ornamental Shrubs. The varieties should be selected so as to give a succession of bloom from early spring to late fall, and in describing the different kinds we have mentioned the approximate time of flowering. When you plant Ornamentals around your home you add greatly to the value. Many a place is sold that, had it been planted out previously with a few shrubs and vines, would have brought considerably more owing to its more attractive appearance. Every ten or fifteen dollars spent in ornamenting the home grounds will in many cases add hundreds of dollars to the selling value.

Shrubby groupings are best planted at the boundaries or line of property, the foundations of buildings and the borders of walks and drives, for it is a rule of landscape gardening that the central lawn should be kept open. Good plantings relieve the angularity of a foundation and round off the corners of the yard.

(A) Denotes shrubs which attain 2 to 4 feet in height.

(B) Denotes shrubs which attain 5 to 3 feet in height.

(C) Denotes shrubs which attain 9 to 12 feet in height.

ALTHEA (*Hibiscus Syriacus*)

Beautiful free-growing shrubs that bloom during August and September when most other trees and shrubs are out of bloom. Hardy and easily grown. Commonly called Rose of Sharon. Can be pruned to any desired size. (C) 60 cents each; \$5.00 per 10.

Anemonaeflorus—Double flowers, dark vinous red.

Ardens—Double, violet rose.

Comte de Flandre—Rosy white, double.

Jeanne de Arc—White, double flowers.

CALYCANTHUS (*Sweet Scented Shrub*)

Foliage of handsome appearance and flowers are of a rare chocolate color. Both wood and flowers are peculiarly fragrant. Blooms in June. (B) 50 cents each; \$4.50 per 10.

ALTHEA (*Hibiscus Syriacus*)

BUTTERFLY BUSH (*Buddleya*)

This beautiful new shrub will mature to nearly full size the first summer, maintaining a height of four to six feet. Makes a handsome bush and produces beautiful lilac colored spikes of flowers, 8 to 14 inches long, in the greatest profusion. Commences to bloom in June or July and continues until severe frosts nip it. The flowers have a great attraction to butterflies and we have counted over thirty butterflies on a bush at one time. The bush is semi-herbaceous and should be cut back near the ground each spring and in a few weeks will attain a height of four to six feet. 60 cents each; \$5.00 per 10.

DEUTZIA

Their hardihood, fine habit, luxuriant foliage and profusion of attractive flowers render the Deutzias among the most beautiful and popular shrubs. 50 cents each; \$4.50 per 10.

Gracilis—A charming species of dwarf habit introduced from Japan. Covered with pure white flowers in May. Branches slender and graceful. (A).

Lemoinei—A superb dwarf variety of graceful appearance. Flowers pure white, double. Blooms in June. (A).

Pride of Rochester—One of the leading varieties of Deutzias and covered in June with showy, double white flowers tinted with rose on edge. (B).

BUTTERFLY BUSH (*Buddleya*)

BARBERRY, JAPAN (Berberry Thunbergii)

A beautiful shrub much used for individual planting and one of the finest for hedges. Extremely hardy and very ornamental. Leaves small, dark green, and turn to beautiful shades of red and yellow in autumn. The yellow flowers in June are followed by bright red berries that hang on well into the winter. (A) 50 cents each; \$4.00 per 10.

EUROPEAN RED DOGWOOD

(*Cornus Sanguinea*)

A very pretty shrub with blood-red bark in winter. Good for damp places. Branches upright and spreading. Fruits black. (B) 50 cents each; \$4.50 per 10.

FRINGE, PURPLE (Rhus Cotinus)

A small tree or shrub and very much admired on account of its peculiar fringe or hair like flowers, covering the whole surface of the bush in midsummer. (C) 60 cents each; \$5.00 per 10.

FALSE INDIGO (Amorpha Fruiticosa)

A strong growing shrub with finger like spikes of indigo colored flowers in June. (B) 50 cents each; \$4.00 per 10.

GOLDEN BELL, FORTUNES (Forsythia Fortunei)

One of the earliest blooming shrubs, its golden yellow flowers appearing in great profusion just before the leaves come. Foliage dark green and attractive. Remember this one! (B) 50 cents each; \$4.50 per 10.

HYDRANGEA

The Hydrangeas are among our leading ornamental shrubs and rightly so, for their handsome appearance and beautiful flowering habit is hard to equal.

Arborescens (Hills of Snow)—One of the most valuable hardy shrubs of recent introduction. Blooms are of the very largest size, snow white color, coming into flower in June and lasting through August. (B) 65 cents each; \$6.00 per 10.

Paniculata Grandiflora—Perhaps the most popular of all hardy shrubs. The immense heads of bloom are cream color in bud, pure white when fully open, changing to pink and bronze with age and finally brown when frosted. Very showy and effective. Blooms in August and September. (B) 60 cents each; \$5.00 per 10.

HONEYSUCKLE Bush (Lonicera Tartarica)

Handsome, upright shrubs with showy flowers and bright fruit. Very hardy and popular. Good for very cold districts. We have three colors, white, pink or red. (B) 50 cents each; \$4.00 per 10.

JAPAN QUINCE (Cydonia Japonica)

This fine shrub, early in spring, is covered with dazzling scarlet flowers which give bush a very attractive appearance. Foliage bright green and glossy. Very popular. (B) 50 cents each; \$4.00 per 10.

LILAC (Syringa)

One of the finest and most popular flowering shrubs and too well-known for lengthy description.

Vulgaris—Common purple. A strong grower, 55 cents each; \$4.50 per 10.

Vulgaris Alba—Common white lilac. 55 cents each; \$4.50 per 10.

HYDRANGEA PANICULATA

Persica Alba—White Persian lilac. Beautiful and very fragrant. 65 cents each; \$5.50 per 10.

French Named Varieties—Very large and showy flowers. 75 cents each; \$7.00 per 10.

Charles Joly—Very large spike. Double blackish red.

Rothomeogenthis—Violaceous lilac. Very attractive.

Souv. de L Spaeth—Blackish red. One of the finest.

SNOWBALL, Common (Viburnum Opulus Pleno)

The old fashioned snowball and still has a place in nearly every planting. Covered with large balls of snow white flowers in June (B) 50 cents each; \$4.50 per 10.

SNOWBERRY (Symphocarpos Racemosus)

An old, very popular shrub with pink flowers in summer which are followed by white, waxy berries in autumn. Especially valuable for planting in shade and in undergrowth. (A) 50 cents each; \$4.50 per 10.

SYRINGA or MOCK ORANGE (Philadelphus)

An old, well-known favorite with cream colored, very fragrant flowers in June. (C) 50 cents each; \$4.50 per 10.

WEIGELA (Diervilla)

A valuable family of shrubs, handsome in foliage as well as flowers. Easily grown and adapted to a variety of soils. Flowers are trumpet-shaped and borne thickly along the branches. (B) 60 cents each; \$5.00 per 10.

Candida—A vigorous, upright growing weigela. Flowers pure white and produced in the greatest profusion in June and continue to bloom throughout the summer.

Eva Rathke—A charming new weigela with dark carmine-red flowers; a beautiful and distinct shade. Very choice.

Rosea—The old fashioned weigela. Flowers rose colored and produced in late May and June.

NOVA SCOTIA

Enclosed please find order for Everbearing Strawberry Plants. I received the others in good condition.

Mrs. J. MacMillan, Lake Ainslie, South Side.
N. S. May 1922

SPIREA (Van Houttei)

SPIREA

The spiraeas are all elegant, low shrubs of the easiest culture and their blooming extends over a period of over three months. Nothing finer for planting singly, or in groups. **50 cents each; \$4.50 per 10.**

Anthony Waterer—A dwarf variety of great beauty. Produces broad heads of deep, pink flowers which bloom almost continuously from June throughout the season. **(A).**

Billardi—Covered with deep-rose colored spikes of flowers during July and August. **(B)....**

Reevesiana—A charming shrub with narrow, pointed leaves, and large round clusters of flowers which cover the plant in May and June. **(B).**

Thunbergii—Of dwarf habit and rounded, graceful form. Foliage narrow and yellowish green. Flowers white, appearing early in spring. **(B).**

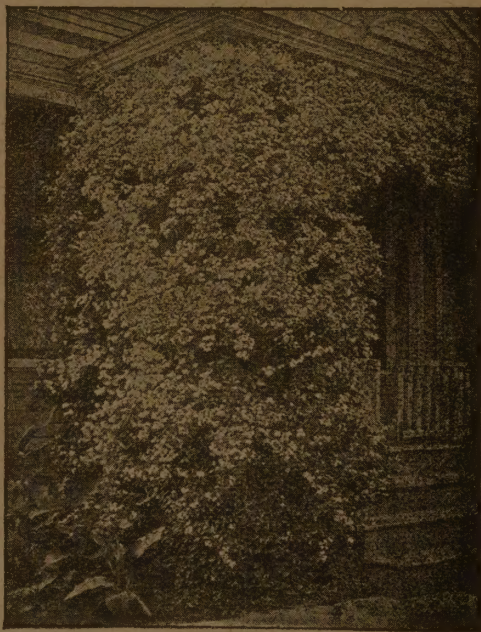

Van Houttei—Without doubt the finest variety in cultivation. In May and June the shrubs are covered with a mass of large, white flowers presenting a beautiful appearance. One of the finest shrubs in the catalogue. **40 cents each; \$3.50 per 10. (B).**

Ornamental Vines

CLEMATIS PANICULATA—A great novelty from Japan, and has proven to be one of the most desirable, useful and beautiful of hardy climbing vines. A luxuriant grower and profuse bloomer, and is a mass of small, white, fragrant flowers in September. **60 cents each; \$5.00 per 10.**

CLEMATIS JACKMANII—Large, intense violet purple flowers and remarkable for its velvety richness. Free in growth and an abundant and successive bloomer. Plant in rich soil and where they can have plenty of sun. **90 cents each; \$8.00 per 10.**

DUTCHMAN'S PIPE (*Aristolochia Sipho*)—This is an ideal vine for situations requiring dense shade. Vine a rapid grower and covered

CLEMATIS PANICULATA

with very large, broad, closely laid deep green leaves. Flowers are of a brownish color resembling a miniature pipe. **\$1.00 each; \$9.00 per 10.**

HONEYSUCKLE, Halls Japan (*Lonicera Halliana*)—A strong, vigorous almost evergreen vine with very fragrant pure white flowers changing to yellow. The vine is covered with flowers from July to November. Holds its leaves until nearly the last of December. Perfectly hardy and adaptable to any purpose. **60 cents each; \$5.00 per 10.**

IVY, JAPAN (*Ampelopsis Veitchii*)—Immensely popular as a climber for walls, covering stumps, rookeries, etc. Foliage a handsome green in summer changing to crimson in autumn. Very rapid grower. Often called Boston Ivy. **60 cents each; \$5.00 per 10.**

CLIMBING HONEYSUCKLE (Hall's Japan)

AMERICAN IVY (*Ampelopsis Quinquefolia*)

IVY, AMERICAN (*Ampelopsis Quinquefolia*)
One of the most popular climbing vines for covering walls, etc. Clings freely to smooth surface. Commonly called Virginia Creeper. 50 cents each; \$4.00 per 10.

AMPELOPSIS ENGELMANII—Shorter jointed and having finer foliage than *Quinquefolia*. Clings to brick or stone; a rapid grower and hardy. The best for the north and northwest districts. 60 cents each; \$5.00 per 10.

TRUMPET FLOWER (*Bignonia Radicans*)—A vigorous and hardy climber with clusters of scarlet trumpet-shaped flowers in August. Clings to wall like ivy. 50 cents each; \$4.50 per 10.

WISTARIA Chinensis—A beautiful climbing vine bearing large clusters of pale blue flowers during the summer. A very rapid grower and one of the most elegant of all climbing plants. 70 cents each; \$6.00 per 10.

Hedge Plants

BARBERRY, JAPAN (*Berberis Thunbergii*)
A very handsome hedge plant and extremely hardy. Dwarf growing, foliage bright green and takes on a brilliant and beautiful red effect in autumn. Red berries also appear at that time and hang on well into the winter. Very ornamental and in great demand. 12 to 18-inch size, 35 cents each; \$3.00 per 10; \$25.00 per 100.

BARBERRY THUNBERGII HEDGE

CALIFORNIA PRIVET (*Ligustrum Ovalifolium*)—A rapid and vigorous grower. It has handsome glossy, oval-shaped foliage which remains on well into the winter. Very popular.

18 to 24-inch size, 25 cents each; \$2.00 per 10; \$15.00 per 100.

2 to 3-foot size—30 cents each; \$2.50 per 10; \$20.00 per 100.

CALIFORNIA PRIVET HEDGE

IBOTA PRIVET (*Ligustrum Ibotia*)—A very popular hedge plant. Foliage somewhat smaller than California and branches more spreading. The hardiest privet and very largely planted. 3-foot size, 40 cents each; \$3.50 per 10; \$30.00 per 100.

Rose Bushes

We offer the following varieties of roses and assure you that all are leaders in their respective classes. Practically all we list are recommended by the Central Experimental Farm, Ottawa, for culture in Canada. We offer strong 2-year No. 1 bushes.

HYBRID PERPETUAL

75 cents each; \$7.00 per 10.

FRAU KARL DRUSCHKI—The finest white hybrid perpetual. Large, full flowers of splendid form. The ideal rose for cemetery planting.

GENERAL JACQUEMINOT—Brilliant crimson, large and fine. Beautiful in bud and a universal favorite.

HUGH DICKSON—Intense crimson, shaded scarlet; very large, full and magnificent form. A continuous bloomer and very fragrant.

MRS. JOHN LAING—Delicate pink color and very fragrant. A very free and continuous bloomer.

MRS. R. G. SHARMAN—CRAWFORD—Beautiful shade of clear rosy-pink. Blooms from early to late.

ULRICH BRUNNER—Cherry red, fragrant. One of the finest roses for cottage gardens.

HYBRID TEAS

85 cents each; \$8.00 per 10

GRUSS AN TEPLITZ—Bright crimson, red centre. Fragrant, very vigorous. A fine free grower and profuse bloomer.

LADY ASHTOWN—A very persistent bloomer giving nice long, pointed buds with deep pink flowers. Extra.

LADY URSULA—Flowers, large, full, flesh pink and fragrant. Continuous bloomer.

MADAME RAVARY—One of the finest yellow roses grown. Beautiful golden yellow buds opening to orange yellow.

RICHMOND—Velvety fiery crimson. Very fine.

WHITE KILLARNEY—Beautiful waxy white. A good grower and bloomer.

DWARF POLYANTHA OR "BABY" ROSES

A beautiful class of dwarf roses reaching a height of twelve to eighteen inches. They are very persistent bloomers giving an abundance of roses all Summer and Fall. Very popular for bedding, borders, edgings or mixed with other plants in the foreground. **70 cents each; \$6.50 per 10.**

BABY TAUSENSCHON—Pink.

ERNA TESCHENDORFF—Carmine red.

KATHARINA ZEIMET—White.

MISS EDITH CAVELL—Brilliant crimson, white eye.

HARDY CLIMBING ROSES

65 cents each; \$6.00 per 10

CRIMSON RAMBLER—Deep crimson. Well known and very popular.

HIAWATHA—Crimson with white eye, single. Very large clusters of attractive flowers.

TAUSENSCHON—A delightful shade of soft pink changing to carmine on reverse side of petals. Individual flowers, very large.

ROSE, FRAU KARL DRUSCHKI

WHITE DOROTHY PERKINS—The best white climber.

DOROTHY PERKINS—A most beautiful shell pink rambler. Flowers very double, nearly two inches across.

Hardy Perennial Plants

DELPHINIUM (Larkspur)—A remarkably showy class of tall growing plants producing magnificent spikes of blue flowers in summer. No flower affords greater satisfaction than these. **25 cents each; \$2.00 per 10.**

DIGITALIS (Foxglove)—Do not miss these gorgeous flowers in your collection. Beautiful color effects are produced ranging from purple to white. **25 cents each; \$2.00 per 10.**

FUNKIA (Day Lily)—Very large, pure white, lily shaped fragrant flowers in August and September. The broad, massive foliage makes them very attractive for the border even when not in flower. They succeed equally well in sun or shade. **30 cents each; \$2.50 per 10.**

YUCCA (Adam's Needle)—A tropical looking

plant with long, narrow leaves that remain green the entire year. It throws up a strong flower stem in the summer 3 to 5 feet high, bearing a large, spike of creamy white, bell-shaped flowers which retain their beauty for a long time. Very hardy and likes sun and dry soil. **30 cents each; \$2.50 per 10.**

IRIS

The Iris is one of the finest of our hardy plants. Not particular as to soil and location, but asking only that the sun shine upon it. It throws up spikes of bloom that are marvellous in their delicacy of structure and the colorings which are wonderful in their blendings and variety. Very effective when planted in groups or used for borders. **25 cents each; \$2.00 per 10.**

"S" represents upright petals. "F" the drooping ones.

Flavescens—Delicate shades of soft yellow.

Florentina—Pure white, flushed blue.

Gertrude—Fine large, violet blue.

Honorabilis—S, yellow F. rich mahogany brown.

Ingeborg—White, large flower

Mme. Chereau—White, elegantly edged with clear blue.

Orientalis—Deep violet blue.

Ochra Leuca—White with orange yellow blotch on falls.

Walhalla—S. Lavender; F. wine crimson.

White Siberica—White; S. yellow.

Williston—S. lavender; F. purple.

MIXED—A good mixture, our selection. **20 cents each; \$1.50 per 10.**

IRIS

PEONIES

One of the most popular flowers in cultivation and demand grows greater every year. They require no protection, come up every season, can be left in the ground indefinitely and will thrive in any soil. They prefer a sunny location.

Duchess de Nemours—Pure white, strong grower and very fragrant. One of the best. 50 cents each.

Festiva Maxima—White with center petals sometimes tipped crimson. Regarded by many as the finest white in existence. 50 cents each.

Madonna—Pink, chamois and sulphur shade. Extra. 60 cents.

Marguerite Gerard—Hydrangea pink, changing to creamy white. A beautiful variety. 60 cents each.

Prince Imperial—Amaranth red. Tall. Extra fine. 55 cents each.

Raphael—Bright garnet red. Very showy. 55 cents each.

Rubra Triumphans. Bright purplish crimson. A fine variety. 55 cents.

PEONIES

PHLOX

A grand plant for grouping or in borders. Very showy and hardy. In color they range from pure white to the richest crimson and purple, and from soft rose and salmon to bright coral red, all having a delicate fragrance. Will succeed in most any rich soil. .25 cents each; \$2.00 per 10.

Athis—Very tall, fine salmon.

Astrild—Carmine.

Bridesmaid—White, carmine eye.

Mrs. Jenkins—Pure white.

Peach Blow—Delicate pink.

Rhineland—Salmon pink, claret eye.

Bulbs

DAHLIAS

Everyone should have these beautiful flowers in their garden or around the house. For so little money and attention

nothing will give more satisfaction. Our Dahlias are all strong field grown roots and will please you. 20 cents each; \$1.75 per 10.

DECORATIVE VARIETIES

Apple Blossom—Blush pink shading to white. Large, very handsome.

Atlas—Deep maroon, large and very fine.

Blue Oban—Deep lavender blue. One of the best of this shade. Extra

Fascination—Beautiful crimson shade.

Kriemhilde—Brilliant pink shading to white at centre.

Oban—A most beautiful dahlia. Rosy lavender overlaid with fawn.

Souvenir De Gustave Doazon—Immense flowers, deep red orange. Extra

SHOW OR FANCY VARIETIES

Albion—Beautiful flower, white tipped mauve, fading to clear white.

A. D. Lavoni—Shell pink, perfect in shape. **Amazon**—Yellow, edged red. Extra fine. **Crimson Ball**—Crimson purple. In constant bloom. **Mrs.**

Gladstone—Soft delicate pink mixed with white. **Striped Banner**—cardinal red with broad white stripe on petal

POMPOM VARIETY

Catharine—A beautiful small yellow variety and extra fine for cutting. Great Bloomer.

Mixed Dahlias—A splendid mixture of different colors. Our selection. 15 cents each; \$1.35 per 10.

GLADIOLI

Of all the fall flowering bulbs the Gladioli is without doubt the most beautiful. For cut flowers there is nothing finer and the outlay for a fine bed or row is very little. There is also big money in selling the flowers for they always bring a fancy price and are much sought after. \$1.00 per 10; \$7.00 per 100.

America—Flesh pink. Exquisite. **Halley**—Delicate salmon pink. Very attractive and popular. **Mrs. F. King**—Light scarlet, very popular.

Loveliness—A beautiful creamy variety with darker markings. Extra fine. **Panama**—Large, clear, pink wax-like flowers. **Peace**—White with pale lilac blotch. One of the finest. **Schwaben**—Pure canary yellow. Immense flowers and very beautiful. **War**—Deep blood red and extra fine. A striking contrast to Peace. **Willy Wigman**—Blush white with dark carmine blotch. Very popular. **Mixed Gladioli**—An excellent mixture of different shades and varieties. 75 cents per 10; \$5.50 per 100.

Important Instructions to Customers

HOW TO ORDER—Kindly use order sheet which you will find in this catalogue, carefully filling out name, post office, express office (if to be sent by express), shipping instructions, etc.

PRICES—The prices in this catalogue set aside all previous quotations. Our prices are for stock delivered at your station or post office, and are as low as first-class stock properly handled and packed, can be sold for. Remember! Cheap plants are usually not the cheapest in the long run.

SHIPPING SEASON—We commence to ship from the 1st to 15th of April, according to season and continue till the latter part of May.

TERMS—No order accepted for less than \$1.00. Cash with order or part cash, balance before shipment. Full remittance must accompany orders sent after April 1st. We will not ship stock except it is paid for in full, except to public institutions.

STOCK AND SHIPPING FACILITIES—Our plants are freshly dug each day from new rows and immediately taken to our packing house and there counted and packed completely protected from sun and wind. When packed they are loaded on our truck and taken to the station.

We ship by American or Canadian National Express from Aylmer and Dominion Express from Port Burwell.

PACKING—All express shipments of plants, etc., are packed in light crates, baskets, or boxes, free of charge, in damp sphagnum moss. This moss is very light and keeps the plants in best possible condition. We make no charge for boxing and packing.

COMPLAINTS OR SHORTAGE—Our strawberry plants are accurately counted and tied in bunches of 25 (usually 26) plants each and each bunch bears a label giving the variety and also number of the counter. In case of short count, give number of counter. Other stock is accurately counted, labelled and tied securely. All claims or adjustments must be made within 5 days of receipt of stock, advising number of each variety and also the number of crates, boxes or packages received. This will enable us to investigate the claim properly. If anything is wrong about your order, write us fairly and decently. Abusive letters do not count with us. In the rush of the busy season when everybody is overworked, mistakes will sometimes occur, but we will adjust all differences where we are to blame in any way.

CLAIMS TO EXPRESS COMPANY—If stock arrives in poor condition you must have agent note same on express bill so claim can be made to express company. This is important and must be done or we cannot replace stock caused by damage.

SUBSTITUTION—Should the supply of any variety become exhausted as sometimes happens late in the season, it is our custom to substitute a similar or better variety, at the same price. When it is desired that we should not do this, write "No Substitution" on the order.

REFERENCES—Royal Bank, Aylmer; Sterling Bank, Port Burwell; any merchant, express agent or postmaster in either Port Burwell or Aylmer.

HOW TO SEND MONEY—Kindly remit by express money order, registered letter, bank draft, or post office order. Postage stamps will be accepted for small amounts. If you send a personal cheque add 15 cents for exchange.

Our Guarantee

On account of our careful methods of growing, labeling and packing plants, etc., mistakes very seldom occur. Therefore we guarantee McConnell's Plants are true to name and free from all insects, or fungus diseases and also that all stock shall be in good growing condition at time of shipment, but we accept all orders with the express understanding that, should any mistake occur, we are not to be held responsible for more than the amount paid us for the plants. We cannot, and will not be held in any way responsible for the crop. All orders are accepted subject to crop and weather conditions and with the mutual understanding that we will not be held responsible for loss or delay in shipment after plants are turned over to the Transportation Company or for inability to fill any order through conditions resulting from an act of nature, labor situation, or for any other cause beyond our control.

REMEMBER ! McCONNELL'S PAY ALL TRANSPORTATION CHARGES TO ANY POINT IN CANADA AT CATALOGUE PRICES. TO POINTS OUTSIDE CANADA, ONE-HALF THE CHARGES

PLANTS FRUITED WELL

Enclosed please find order for Strawberry Plants. I may say that the plants you supplied me 2 seasons ago did well in fruit last year.

A. E. Holder, Dorion Station, Ont., March 1922

THANK YOU

I am pleased to say that the plants arrived in the best of shape and were planted to-day. I might state that I will do all I can to further your interests in the future.

Potatoes and Seeds

SEED POTATOES

Our stock of potatoes was grown especially for seed purposes and matured late in the season, which is essential for the best grade of seed.

IRISH COBBLER—The standard early white potato. 1 lb. 25 cents; 5 lbs. \$1.00 by mail postpaid. Peck \$1.00; Bushel \$3.00 by express at purchaser's expense.

GREEN MOUNTAIN—Our stock of this standard main crop variety was grown from seed obtained last season from a grower in New Ontario who by selection has developed a strain yielding 1100 (eleven hundred) bushels per acre. This is verified by the Government's inspectors. 1 lb. 25 cents; 5 lbs. \$1.00 by mail postpaid; Peck \$1.25; bushel \$4.00, by express at purchaser's expense.

ROXBURY—A splendid variety of the "Rural" type, large, of perfect form and very productive. The best of its class we have grown. 1 lb. 25 cents; 5 lbs. \$1.00; by mail postpaid; Peck \$1.00; Bushel \$3.00, by express at purchaser's expense.

PEACH BLOW—This is the old favorite of our fathers 50 years ago, and is better than ever. We obtained our seed from one of the far Western States, where at one of the experimental stations it has been so improved in type by selection that it rivals Green Mountain in perfection of form. Our stock being limited we offer them only in small lots, but with their great productiveness one can obtain a considerable planting for next year. Try some, they will delight you. 1 lb. 40 cents; 3 lbs. \$1.00; 5 lbs. \$1.50, by mail postpaid.

POTATO SEED

This seed produces new varieties of potatoes and the plants are as easily grown and in the same way as tomatoes, except that the plants need hilling like other potatoes. The seed we offer was saved by ourselves from one of our best standard white varieties and each package will give from 200 to 300 plants, among which are sure to be a number of valuable new sorts. This is very interesting work. Price per packet 25 cents.

SWEET CORN

GOLDEN BANTAM—The well-known standard for quality. 1-4 lb. 15c; 1 lb. 40 cts.; 5 lb. \$1.50 Postpaid.

GOLDEN EVERGREEN—This is a new sort, combining the delicious quality of Golden Bantam with the "evergreen" habit and large ear of White Evergreen. A week later than Bantam. A great acquisition. Pkt. 10 cts; 1-4 lb. 25 cents; 1-2 lb. 40 cts.; 1 lb. 75 cts. Postpaid.

BERRY GROWER'S TALLY CARD SYSTEM

This is the simplest and most economical system of keeping tally with berry pickers. Used by nearly all leading berry growers. Consists of one conductor punch and 100 tags. These tags are printed in square spaces to punch out. The squares are marked 1, 2 and 6 quart spaces and when a picker brings in some berries the correct quantity is punched out. When all spaces are punched out the picker has picked 100 quarts. A space on tag is left for picker's name. A hundred tags will punch out 10,000 quarts. Price for complete system postpaid—100 tags and one punch, \$3.00. Additional tags, \$2.00 per 100, postpaid.

BERRY BOXES AND CRATES

So many write us for prices on boxes and crates or ask us where they can procure them that we have decided to list them for the convenience of our customers. We are making the price just enough over cost to cover the expense we incur. The goods will be shipped direct from the factory f.o.b. shipping point, the customer paying transportation charges. In ordering state if wanted by express or freight.

Quart Berry Boxes—\$4.00 for 500; \$7.50 per 1000.
27 Box Crates (in flat) \$3.50 per 10; \$30.00 per 100.
6 Quart Fruit Baskets \$6.75 per 100.

24 Box Crates (in flat) \$3.25 per 10; \$28.00 per 100
11 Quart Fruit Baskets, \$7.50 per 100.
5 and 11 Quart Leno Covers, \$2.50 per 100.
6 and 11 Quart Flat Covers, \$2.00 per 100.

POP CORN

Pkt. 10 cts; 1-4 lb. 20 cts; 1 lb. 50 cts.

WHITE RICE—The popular parching corn.

RED RICE—Similar to White Rice except in color.

MUSKMELON

SALMON QUEEN—A deeply-netted green skinned variety with rich, salmon colored flesh; thick, sweet and rich. None better for home use or market. Pkt. 100 seeds 10 cts; Oz. 30 cts.; quarter lb. \$1.00 postpaid.

CASSABA—This is the new long-keeping muskmelon, in season from late fall until late in the winter. They contain no seed cavity, being solid like a watermelon and seldom ripen on the vines in this latitude, but are gathered before freezing weather and stored in a cool, dark, dry place, not allowing them to touch each other, when all melons, even the half-grown ones will gradually ripen. The skin is thin, flesh, fine-grained and of delicious flavor, similar to pineapple. When the skin becomes slightly soft and moist, they are ready to eat. Pkt. of 100 seeds, 25 cents.

WATERMELON

Pkt. 10 cts.; Oz. 25 cts.; 1-4 lb. 75 cts.

EUREKA—One of the very best kinds, large, oblong, light green skin. Flesh, bright scarlet, very sweet, white seeds.

BLACK CHILIAN—A most valuable new melon of medium size, nearly round, dark green, skin thin but very tough, making it a good shipper. Flesh bright red, rich and sugary. Seeds black.

BEANS

Pkt. 10 cts; 1-4 lb. 15 cts.; 1 lb. 40 cts. Postpaid

WHITE KIDNEY WAX—This is the one and only all-purpose bean with which we are acquainted, being unexcelled by any other, either as a snap bean, a shell bean or a dry bean. It is also very productive.

RED KIDNEY—A very large, productive red bean, especially valuable as a green shell bean. Excellent also as a dry bean.

PUMPKIN

Pkt. 50 seeds, 10 cts.; Oz. 30 cts., 1-4 lb. \$1.00

GOLDEN NUGGET—A medium sized, yellow variety, very sweet and fine grained, having that rich, golden-yellow color so desirable for pies. Very prolific.

SQUASH

Pkt. 50 seeds 10 cents; oz. 30c; 1-4 lb. \$1.00.

DELICIOUS—The finest in flavor and quality of squashes. Mottled green, of medium size and keeps all winter. Has no hard shell.
